# ENVIRONMENTAL SCAN OF TELEHEALTH TECHNICAL ASSISTANCE RESOURCES

September 30, 2022

## National Health Center Telehealth Resource Center Project

### ENVIRONMENTAL SCAN of TELEHEALTH TECHNICAL ASSISTANCE RESOURCES

September 30, 2022

#### BACKGROUND:

The Center for Connected Health Policy (CCHP), on behalf of the National Association of Community Health Centers (NACHC), conducted an initial environmental scan of available tools for federally qualified health centers (FQHCs) in regards to the use of telehealth to deliver services. Building off work done by the NACHC-sponsored Telehealth Training and Technical Assistance (TTA) Partners Roundtable in 2021, CCHP organized materials into eight telehealth priority areas that the Roundtable had identified. **These Priority Areas are:**

1. **The Digital Divide**—Access, broadband, equity
2. **Implementation & Operations**—Workflows, procedures, platforms
3. **Quality Assurance**—Measurement, data collection, improvement
4. **Data & Reporting**—Definitions, taxonomy, EHR alignment, reporting systems/process
5. **Policy, Financial Reimbursement & Legal**—Advocacy efforts, regulatory surveillance
6. **Patient Engagement**—Patient education, navigation, outreach, technical support
7. **Clinical Delivery**—Clinician-focused services, CME/CEU, clinical skills, competencies
8. **Financial Models**—Balancing service & payer mixes, reimbursement implications

## PURPOSE OF THIS DOCUMENT:

CCHP's goal for this document is to provide a curated list of the top resources most helpful to FQHCs in each of the eight categories developed by the National Telehealth TTA Partners Roundtable in 2021, listed above. The listed technical assistance resources are meant to offer practical advice or resources to FQHCs on implementing, operating, expanding or sustaining a telehealth program. Therefore, items such as research on telehealth or materials that are focused on one specific platform are not included. We only list items that are publicly accessible.

## METHODOLOGY:

CCHP examined resources that are currently housed in the following:

- **NACHC Health Center Resource Clearinghouse**
  - Health Center Resource Clearinghouse Telehealth Learning Bundle
- **National Consortium of Telehealth Resource Centers (NCTRC) FQHC Telehealth Resources**
- **Health Information Technology, Evaluation, and Quality (HITEQ) Center FQHC Resources**

Additionally, CCHP conducted a general web search utilizing the Google search engine and searched for each individual key term in the eight categories coupled with the term “federally qualified health center” or “FQHC”.

Next, two researchers examined the selected materials. Materials were added to the candidate list based on the following criteria:

- Relevancy to the category
- Source of information (i.e.: was it from a known, reliable entity such as NACHC, a TRC, HITEQ, government entity?)

To determine which items would be selected for the final list, CCHP applied the following criteria:

- Resources needed to be FQHC specific OR had a significant portion of the resource applicable to FQHCs
- Resources needed to focus on telehealth (i.e.: if a document talked about how to collect data, but not how that would work in a clinic setting it was not included)
- Resources needed to be platform- and vendor-agnostic. For example, it could not focus on one specific platform.

During this search, CCHP found several resources that spanned multiple categories because they had been developed as a “playbook” on implementing telehealth or had been recorded as webinars or podcasts. Rather than repeating these resources in each category, CCHP has created a “general” category for these resources at the end.

## THE DIGITAL DIVIDE:

### Access, Broadband, Equity

## GENERAL RESOURCES:

- FQHC Telehealth Consortium—The organization's Telehealth Playbook contains some general information for a variety of the categories above, and also contains links to other resources that answer specific questions.
  - **FQHC Telehealth Playbook**
- Health Center Resource Clearinghouse—Clearinghouse for a multitude of resources related to telehealth.
  - **Telehealth Optimization Quick Guide for Health Centers**
- American Medical Association—A playbook to implementing telehealth in your organization. Though it is not FQHC-specific, this playbook contains useful general information.
  - **Digital Health Implementation Playbook**
- National Consortium of Telehealth Resource Centers
  - **Telehealth & Virtual Services: A Guide For FQHCs And RHCs**
  - **FQHC Telehealth Resources Collection**
- School-Based Health Alliance
  - **School-Based Telehealth Playbook**

## FEDERAL TORT CLAIMS ACT (FTCA)/HRSA RESOURCES:

FTCA coverage, for deemed health centers, is limited to the performance of medical, surgical, dental, or related functions within the scope of the approved Federal section 330 grant project, which includes sites, services, and other activities or locations, as defined in the covered entity's grant application and any subsequently approved change in scope requests. Therefore, a key determinant for FTCA coverage is whether the covered entity is providing services within the health center's scope of project, under the Health Center Program authorizing statute. During the early phases of the COVID-19 Pandemic, HRSA issued several FTCA related telehealth FAQs and Determination that provided deemed health centers with coverage eligibility when providing services via telehealth to health center patients and non-patients. The primary FTCA telehealth related information and guidance are outlined in the following documents:

- **PAL 2020-01: Telehealth and Health Center Scope of Project**—highlights relevant considerations for health centers in providing in-scope services through telehealth.

- Additional FTCA policy and program guidance resources related to telehealth:
- HRSA COVID-19 Frequently Asked Questions (FAQs): Answers the question—**Does FTCA coverage extend to telehealth visits with both established patients and non-health center patients?**
- **FTCA Frequently Asked Questions: Answers the question—During the declared COVID-19 emergency, do FTCA protections apply to health center providers who provide telehealth services to health center patients located across state lines?**
- **HHS—Determination of Coverage for COVID-19-Related Activities by Health Center Providers Letter**

Should additional questions arrive, they may be submitted through the **BPHC Contact Form**. Select "FTCA Health Center Program" as the question type and General Inquiries as the category, or call **877-464-4772**, option 1, 8 a.m. to 5:30 p.m. ET, Monday–Friday (except federal holidays).
